**Serology Tests**

When you suspect an illness or infection in patient, use serology tests from Diagnostic Automation / Cortez Diagnostics, Inc. to make a diagnosis. You can pick up a rapid plasma regain, systemic lupus erythematosus, rheumatoid factor, or a mono test kit and have the answer you need to proceed with medical care. Our dependable tests are able to properly identify the antibodies in your patient's serum, giving you a clear and concise analysis of what is going on. Review our selection of serology kits and place your order for the items you need for your establishment today. Once your order has been placed, we ship your items to you as fast as possible. If you have any questions about your rapid plasma regain or mono test kit, we are prepared to answer any questions. Our business works hard to find creative ways to serve and cooperate with diagnostics specialists across the world.
